

Purpose-Built for the Modern Intelligent Video Surveillance Stack

Say Goodbye to Dark Data

Realwave is designed for the Modern Intelligent Video Surveillance (IVS) Stack, delivering video insights across enterprises instantly. Using accelerated compute with secure, high-speed data pipes for real-time global distribution, while optimizing archives to eliminate “dark data,” and maximize value.

In an era of exploding video data—petabytes from hundreds of cameras—Realwave converts passive surveillance to proactive intelligence. Empowering Tech Executives in Healthcare, SLED, Enterprise, Retail, Transportation, and SMB to tackle dark data, legacy burdens, and compliance risks like GDPR and HIPAA.

Our unified platform ends vendor lock-in, siloed data, and manual probes by fusing AI analytics with related device integration for context-driven insights. Featuring hybrid edge-to-cloud architecture and 24/7 services, Realwave provides scalable, secure IVS, transforming video into a strategic asset.

Key Benefits for Technology Executives:

- **Scalable Security & Compliance:** Ensure data sovereignty, no vendor lock-in, full PII compliance.
- **Operational Efficiency:** Reduce false positives by 90%, manual scrubbing by 80% and 99% asset reconciliation via AI tailored workflows.
- **Future-Proof Innovation:** Easily swap into new VLMs, vector databases for predictive analytics, actionable insights, and adaptable reporting.

The Realwave line up: Proactive & Intelligent

RealEdge: Intelligent Hardware & Secure Connectivity

RealEdge provides a secure edge-to-cloud backbone to manage AI workloads and enterprise video management. It features serverless AI cameras that offer a perfect way to get started with AI, seamlessly integrating with new and existing systems without vendor lock-in. 3D LiDAR sensors deliver privacy-first, long-range tracking with high accuracy, while accelerated recorders process images in real-time as they are recorded. From small sites to global hubs, RealEdge eliminates complex deployments, optimizes bandwidth, and enables real-time monitoring through tailored reporting workflows.

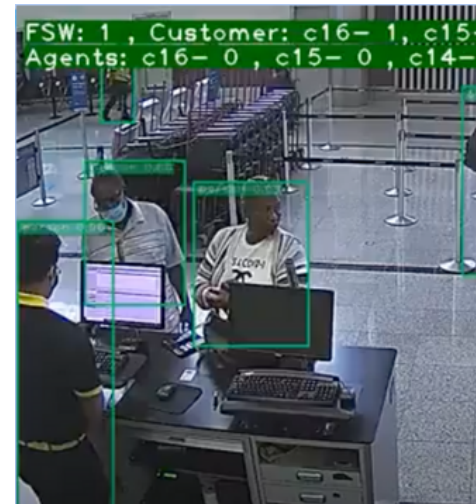

RealVue: Unified Video Management

Powered by Network Optix, which powers over 5 million camera channels globally, RealVue integrates 45,000+ devices from 790+ manufacturers into a single command center. Features include Flex GRID UI for 64 feeds, mobile access with fisheye dewarping/PTZ, automatic camera discovery, and flexible storage (local, NAS, cloud). RealVue delivers crystal-clear visibility across enterprises, reducing rip-and-replace needs and feature real-time streaming and the fastest retrieval speeds the space.

RealIntelligence (IQ): Context-Aware Analytics & Event Fusion

IQ fuses AI skillsets (RealTrack for object/vehicle tracking, RealFace for facial recognition, RealPlate for LPR/OCR) with external data from 167+ POS systems, access control, alarms, scales, GPS and more. Fusion workflows, monitor for exceptions like refund fraud or unauthorized access, dispatching priority reporting through RealInsights. RealIntelligence supports forensics search and is the basis for advanced AI solutions such as queue analysis, asset monitoring and armed/fallen person alerts

RealInsights (IX): Actionable Reporting & Dashboards

IX turns insights into strategy with customizable KPI scorecards (beta), fast forensic search across video/POS/IoT, and automated alerts via SMS/email/API. It supports demographics-enriched analytics and prompt-based queries for rapid decisions. Why it matters: Eliminates hours of manual investigations, driving ROI through metrics like queue optimization in retail or dwell time reductions in airports—transforming video into business intelligence.

Realwave Professional Services: End-to-End Support for Maximum Value

Realwave's services simplify IVS, handling everything from onboarding to continuous optimization. With 24/7 monitoring, we eliminate "truck rolls," downtime, and skills gaps—ensuring your system evolves with your business.

Consulting Services:

Expert guidance for assessing your current environment, roadmap and how to get started with AI. We tailor strategies for sectors like healthcare (HIPAA compliance) or enterprise (hybrid cloud repatriation), aligning with trends like the EU AI Act.

Deployment Services:

End-to-end setup of RealEdge, RealVue, IQ, and IX, including seamless integrations with many enterprise solutions. We support serverless (AI camera-to-cloud) or hybrid models, ensuring rapid rollout with minimal disruption.

Advanced Perception Services:

Custom AI training for RealTrack, RealFace, and RealPlate and other computer vision initiatives. We've found that IVS success is 25% on the model and 75% on the pipeline design and reporting structure.

Managed Services:

24/7 health checks, proactive maintenance, Tier 1-3 support, and continuous improvements via secure remote connections. Includes workflows, alerts, and realtime system monitoring—delivering peace of mind for all Realwave customers.

Why Realwave Services Stand Out:

We solve IVS pain points with interoperability, best-of-breed analytics, and comprehensive visibility. Trusted to manage over 4 million cameras globally, our services yield outcomes like 60% shrink reduction or 95% trailer ID accuracy. Join our IX Dashboards beta or explore long-term archive solutions.
