

RealVue

Your Command Center for Intelligent Surveillance

***"Transform Your Cameras into a Unified,
Scalable Surveillance Solution"***

RealVue: Crystal-Clear Video Management

RealVue, built on Network Optix—which powers over 5 million camera channels globally—redefines video surveillance by unifying new and existing cameras into a single, intuitive command center without vendor lock-in. Compatible with over 45,000 devices from 790+ manufacturers, it delivers crystal-clear visibility across retail, campuses, or global enterprises. Access live and recorded video effortlessly via desktop, mobile, or cloud, with features like Flex GRID UI for up to 64 feeds, fisheye dewarping/PTZ control, automatic camera discovery, and flexible storage (local, NAS, cloud). Seamlessly integrated with Realwave's AI-driven analytics (RealIntelligence) and edge hardware (RealEdge). RealVue enables real-time streaming, tailored workflows, and the fastest retrieval speeds in the industry—empowering you to see, manage, and act with unmatched efficiency. Its lightweight design runs on any hardware—from Raspberry Pi to enterprise servers—while advanced automation and developer tools ensure rapid third-party integrations. Backed by Realwave's 24/7 Pro Services, RealVue is your gateway to smarter surveillance.

Key Features

- **Universal Compatibility:** Integrates 99% of IP cameras via ONVIF, supporting 45,000+ devices—eliminating rip-and-replace and vendor lock-in.
- **Intuitive Interface:** Flex GRID UI for up to 64 feeds with smart motion search and customizable layouts for tailored reporting.
- **Mobile Accessibility:** Low-latency live viewing, fisheye dewarping, and PTZ control on iOS/Android for real-time monitoring anywhere.
- **Scalable Architecture:** **Automatic** camera discovery and flexible storage (local, NAS, cloud) for hybrid scalability.
- **Developer-Friendly:** RESTful APIs, SDKs, and HTTP Events/Actions for rapid integrations with IoT, access control, or AI analytics.
- **Secure & Reliable:** HTTPS/SSL encryption, SOC2 Type 2 compliance, and automatic failover for data protection.
- **Cloud Connectivity:** RealCloud enables secure remote access, system merging, and real-time video streaming via AWS Proxy.

Technical Excellence & Strategic Benefits

Technical Highlights

- **Flexible Storage:** Supports local drives, SD cards, NAS, or cloud (e.g., Veracity Coldstore, Wasabi S3) for hybrid scalability.
- **Advanced Automation:** IFTTT Rules Engine for custom event triggers in access control, fire, or building systems—enabling tailored workflows.
- **AI Integration:** Connects seamlessly with RealIntelligence for analytics like face detection and object tracking, with Metadata SDK for custom plugins.
- **Cross-Platform Support:** Runs on Windows, Linux, macOS, Docker, NVIDIA Jetson for versatile deployment.
- **Fast Search:** Search a year's video in seconds using keywords, bookmarks, or smart motion filters for efficient reporting.
- **Enhanced Exports:** Export single/multi-camera videos with timestamps, watermarks, or password protection.
- **Video Wall & Showreel:** Create timed tours and manage large-scale displays for enhanced situational awareness.

Benefits

RealVue turns video surveillance into a strategic asset with unmatched flexibility and intelligence. Its open platform integrates existing cameras and third-party systems, reducing costs/complexity without vendor lock-in. Scalable from single sites to global networks, it ensures real-time visibility via RealCloud. Advanced automation and AI empower proactive decisions with tailored analytics workflows, while robust security protects data. With Realwave's 24/7 Pro Services, setup/optimization is effortless—trusted to manage over 5 million cameras for operational efficiency and peace of mind.

Specifications

Feature	Details
Supported Devices	45,000+ devices, 790+ manufacturers
Video Streams	Unlimited per Client, Up to 256 streams / server, 64 per layout
Storage Options	Local, NAS, cloud, hybrid
Platforms	Windows, Linux, macOS, Docker, NVIDIA Jetson
Security	HTTPS/SSL, SOC2 Type 2, encrypted video
Mobile Support	iOS, Android with fisheye dewarping, PTZ
Browser Support	Chrome, Firefox, Edge, Opera
