

SLED • PUBLIC SAFETY

## Optimize Video Surveillance Data for SLED & Public Safety

High-performance storage, AI analytics, and resilient infrastructure with Everpure + ePlus Realwave

Public safety and law enforcement agencies are generating massive volumes of video data. Legacy storage systems were not designed for this scale, performance, or security requirements.

Everpure + ePlus Realwave delivers modern, purpose-built infrastructure designed specifically for the demanding needs of SLED and public safety video surveillance environments.

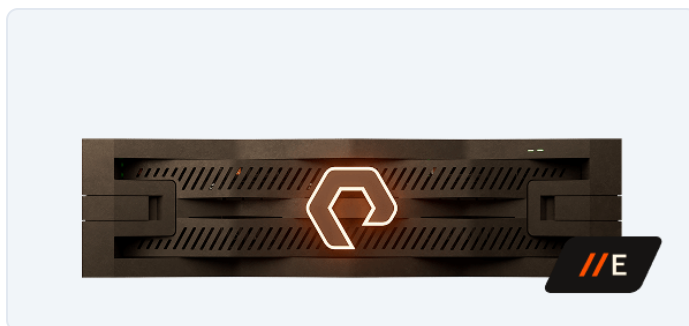

### Purpose-Built Technology

#### FlashBlade//E

Massively scalable unstructured data platform optimized for video surveillance workloads with exceptional density and efficiency.

#### Evergreen//One

Enterprise Storage-as-a-Service with guaranteed SLAs and ransomware recovery capabilities.

### Key Benefits for SLED Environments

#### Massive Scale

Handle petabytes of video data with industry-leading density and performance.

#### AI & Analytics Ready

Purpose-built platform for real-time video analytics and modern AI workloads.

#### Ransomware Resilient

SafeMode snapshots + guaranteed recovery SLAs with next-business-day array shipping.

### **Lower TCO**

Dramatically reduce power, cooling, space, and management overhead.

### **Hybrid Cloud Agility**

Seamless data mobility between on-prem, colo, and public cloud.

### **Financial Flexibility**

Consumption-based model with predictable OPEX and no refresh surprises.
